Please select the ILS you wish to submit.

- SCOF** **Device Name:** (please note that the cost for submission to NFSI is \$2,500)
 DCOF **Device Name:** (please note that the cost for submission to NFSI is \$2,500)

Initials Your device acceptance as an Approved NFSI Tribometer is based on meeting all criteria listed in the NFSI Tribometer Selection Process and upon successful completion of a SCOF Interlaboratory Study and/or a DCOF Interlaboratory Study by a Qualified Individual. Please refer to the following documents:

1. [NFSI Tribometer Selection Process](#)
2. [NFSI SCOF Interlaboratory Study](#)
3. [NFSI DCOF Interlaboratory Study](#)

Initials Along with this application, and per the NFSI ILS's, the neutral third-party observer shall sign each data collection sheet as an attest to the data collection process and forward the data sheets to the NFSI at the following address: NFSI P.O. Box 92607 Southlake, TX 74892 Attn: Laura Cooper or via email to laurac@nfsi.org. The report shall serve to state whether or not the instrument/method passed or failed the NFSI ILS for a Walkway Tribometer.

Term of Validation

Initials If successfully validated by the NFSI inter-laboratory study method, the instrument/method's certification of ILS validation shall be valid for a period of five (05) years, after which to retain its certificate of validation, the instrument must be revalidated according to the then current methodology set forth by the NFSI.

Initials Any change in the design of a walkway tribometer instrument and/or method that materially alters the core method for measuring the wet DCOF of a walkway material invalidates the certification of ILS validation and the new instrument/method shall require revalidation.

Initials You will receive confirmation that your application is received within 48 hours. Your application will be reviewed, and any questions will be emailed to you. Upon receipt of this application and the data collection forms signed by the neutral third-party observer, NFSI's designated analyst(s) shall evaluate the submitted data and render an official statement about the instrument/method's performance on the ILS. This will be accompanied by an invoice for ILS submission.

In lieu of an electronic signature, please enter your initials as verification that this information is true and verifiable and that you agree to the terms stated above. **Initials**
